

The Meconopsis Group Questionnaire (January 2013)

Moving on from the species of *Meconopsis* that members grow (previous questionnaire), it would now also be helpful to know what cultivars of big blue perennial poppies are being grown – in the UK & worldwide. We would therefore be very grateful if you would complete the questionnaire below and return it to Evelyn Stevens: evelyn@thelinns.org.uk or The Linns, Sheriffmuir, Dunblane, Perthshire, FK150LP, UK

Your name.....

Your email address.....

Your postal address.....

.....
Where you grow *Meconopsis* (if different from above).....

.....
Cultivars grown(plus some species – this means some duplication of what you may already have registered!):

Please also indicate how long you have been growing them, how well they are performing and also how you rate them. **Cultivars in bold have received RHS awards.**
